Doctors Testify to God's Works

The 12th WCDN International Christian Medical Conference Malaysia

WCDN International Conference Malaysia (Photos 1, 9); Special Speeches by Dr. Frans J. Cronje and Dr. Chew Weng Chee (Photos 2, 3); healing case presentations, service, praise, and handkerchief healing meeting (Photo 6); Dr. Ong Hock Siew delivering the message in the morning service (Photo 7); President Gilbert Chae, receiving the appreciation plaque from the organizing committee on Dr. Jaerock Lee's behalf (Photo 4); Power Chorus and the attendees (Photos 5, 8)

WCDN (World Christian Doctors Network) is the organization that is proving God's healing works based on medical data. Every year, WCDN holds an International Christian Medical Conference.

This year in 2015, the conference was held in Kuala Lumpur, Malaysia on May 16th and the 17th. The conference was attended by more than 350 doctors and medical professionals from 31 countries including the U.S., Spain, Norway, Bulgaria, and Mexico.

It started with the welcoming message by the Conference Organizational Director, Dr. Daniel Thuraiappah. Then, the message of Dr. Jaerock Lee, Founder and Board Chairman of WCDN, was delivered through a video presentation. He referred to the conference as a precious opportunity to experience the greatness of God's divine nature.

There were nine healing case presentations that had been verified.

The varied cases included: Bipolar II, Oppositional Defiant, and Phonologic Disorders (USA); Nasolacrimal Duct Obstruction (Korea); Mesenteric Thrombosis (USA); Choroidal Neovascularization (Korea); 95% Injury to the Brain (Malaysia); Non-surgical Formation of Double-edged Eyelids (Korea) and Neonatal Cerebral Infarction (Faroe Islands).

WCDN President Dr. Gilbert Chae presented the case of termination of the Ebola virus in an area of DR Congo. Ebola virus was eradicated after Governor of Equateur State of DR Congo received Dr. Jaerock Lee's prayer. Listening to the case, the attendees were amazed and gave great glory to God (on p3). The healing case of acute left ventricular heart failure with pulmonary edema through space-and-time transcending handkerchief prayer (presented by Dr. Brian S. Yeo) received great review (on p4).

Additionally, special speeches

added to the interest. Dr. Chew Weng Chee (Malaysia) talked about some of the experiences he underwent before he came to believe God's healing. Dr. Alvin J. Hwang (Korea) gave a special speech entitled "The Power of God the Creator" and Dr. Frans J. Cronje (South Africa) spoke on "Spiritual Roots of Disease." Also, Lim Siow Lim Shery, a Malaysian woman testified to her experience of divine healing of breast cancer.

The Power Chorus (Manmin Central Church's Performing Arts Committee) gave performances both in the local language and in English. The performances moved the attendees' hearts and gave them fullness. Many people praised the performances and said they had never seen such touching ones in other Christian events.

In particular, Rev. Heesun Lee, Manmin World Guidance Pastor was invited to the conference as a special

guest speaker. She led a handkerchief healing meeting on the first day and gave a special lecture on "The Measure of Faith" on the second day. Through her handkerchief prayer, the attendees repented. Even some who had pains were set free from them, and a man who had difficulty walking came to walk well. They could see the living God's works in that very place. Dr. Timothy Sng, in particular, received the prayer on behalf of his patient who had entered his hospital and fallen into a coma due to encephal meningitis. After the prayer, the patient recovered very quickly.

Through this conference, WCDN solidified administrative power and acquired spiritual strength. They also confirmed the possibility of showing the living God to many unbelieving educated people and many Christians who don't have spiritual faith for salvation. The 13th conference is to be held in Spain in 2016.

Senior Pastor Dr. Jaerock Lee

“And He Himself bore our sins in His body on the cross, so that we might die to sin and live to righteousness; for by His wounds you were healed”
(1 Peter 2:24).

The Lord of Healing

brought to Him a paralytic lying on a bed. Seeing their faith, Jesus said to the paralytic, “Take courage, son; your sins are forgiven.” Before healing the sick man of a disease, Jesus first resolved the problem of his sin. John 5:14 also states, “Behold, you have become well; do not sin anymore, so that nothing worse happens to you.” Even if you receive the healing after receiving the forgiveness of your sins through repentance, if you live in sins again, something worse may happen to you.

We can see that the original root of diseases is sin. To redeem man from sin there has to be shedding of blood, so Jesus was scourged and shed His blood to set us free from all diseases.

2. To meet the Lord the Healer

Thus, those who believe that Jesus redeemed us from our diseases by being flogged and shedding His blood do not have to suffer from infirmities or diseases (Matthew 8:17).

But some believers say, “I am weak” or “It is hard to cast off sins”. If you think and confess that way, you cannot but be weak and find it hard to cast away sins. If you confess, “I am healthy by God’s grace. I am fine” in any kind of situation, God’s grace and strength will come upon you as you confessed. You will overcome tiredness, and the things that seem impossible will change into something possible.

When you receive prayer for healing, you should confess, “I have already been healed,” not “I believe I will be healed.” Then, God will work according to your faith. Some say, “How can I say I am already healed while I still have the pain? Isn’t it lying?” But if you understand spiritual faith, you will not say this.

Hebrews 11:1 says, “Now faith is the assurance of things hoped for, the conviction of things not seen.” When we hope with faith for something that is not visible it will become reality. But it does not mean that it will be accomplished just by confessing with our lips. When we confess with our lips with faith stemming from our hearts, it will be done.

It is the same with healing of a disease. If we believe and say, “Diseases and infirmities are already gone by God’s power,” the Lord will work according to our faith. It is

because Jesus was already whipped and shed His blood to redeem us from our infirmities and diseases.

But if you neither believe this, nor confess it with faith, then your disease will not be cured. No matter how many times you receive the prayer, you will believe in your heart, “I am still sick. I am not healed yet,” so you are actually still sick. Unless you break off these negative thoughts, you cannot experience God’s work.

The power of God the Creator does not only heal diseases, but it shows the work of creation itself. God can heal any disease or disability.

In particular, countless people were healed at the same time in revival meetings and overseas crusades. Although they received the prayer from the stage, they were healed of many incurable diseases such as cancer and AIDS. Moreover, the blind came to see, the mute to speak, the deaf to hear, and the lame to walk. They were even healed while praising or listening to the sermons.

3. The reason believers cannot be healed

Why do some believers still suffer many diseases though they say they believe Jesus redeemed them from diseases by being scourged? It is because they did not follow the righteousness of God.

Exodus 15:26 states, “And He said, ‘If you will give earnest heed to the voice of the LORD your God, and do what is right in His sight, and give ear to His commandments, and keep all His statutes, I will put none of the diseases on you which I have put on the Egyptians; for I, the LORD, am your healer.’” Here, ‘Egypt’ spiritually refers to the world, and the ten plagues that came upon Egypt refer to all the diseases on this earth.

If we keep God’s commands, we will not have any disease. Even if we get sick, if we just repent and turn back, as God said, “I, the LORD, am your healer,” He will heal us. But here the verse tells us to do what is right not in men’s sight but in God’s sight. What is right is different for different people because they see, hear, and learn different things as they grow. Their circumstances and values are all different. That is why one man may think something is right while another man thinks that it is not right.

Therefore, we should take God’s Word as the only standard. What is right in God’s sight is only truly ‘right’.

For example, if other children beat your children, some of you may feel greatly distressed and go to the other parents to protest. However, God’s righteousness teaches us, “Whoever slaps you on your right cheek, turn the other to him also,” “Follow peace,” and “Love even your enemies”. Even if it seems to be losing for the moment to follow God’s righteousness, God will eventually recognize that person and lift him up.

Some people may think, “How can I keep many commands of God?” But to keep God’s commands is not something difficult. It will be easy when we try hard with the belief that the Holy Spirit helps us and God gives us grace and strength.

If you think, “I have too many things to cast off. When can I cast all of them away?” it is better to pray and fast to cast away what seems to be the most difficult thing to cast away in your heart. After you get rid of it, you can throw away the rest more easily. It is just like pulling a tree out. If you pull out the main root of a tree, it is very easy to pull out the remaining roots.

In 2 Chronicles 16, King Asa of southern kingdom of Judah served God very well, but his faith changed and came down with a disease. At that time he should have repented thoroughly and depended on God. But he still did not seek God but doctors. He eventually died because he couldn’t recover. Many people say, “I believe in the almighty God.” But when something happens to them in reality, many of them do not rely on God but on the world. They do not gain spiritual faith with which they can be healed. Only when they get out of the darkness and walk in Light, can they destroy the wall of sins, receive spiritual faith, and experience God’s works.

Dear brothers and sisters in Christ, Jesus redeemed us from all our diseases and infirmities by being scourged and shedding His blood. I urge you to keep God’s commands and depend on God for whom everything is possible. I pray in the name of the Lord that by doing so you will meet the Lord your Healer and receive the blessing of good health.

The Confession of Faith

1. Manmin Central Church believes that the Bible is God-breathed Word that is perfect and flawless.
2. Manmin Central Church believes in the unity and the work of God the Trinity: God the Holy Father, God the Holy Son, and God the Holy Spirit.
3. Manmin Central Church believes that we are forgiven of our sins only by the redeeming blood of Jesus Christ.
4. Manmin Central Church believes in the resurrection and ascension of Jesus Christ, His Second Advent, the Millennium, and the eternal heaven.
5. Members of Manmin Central Church confess their faith through “The Apostles’ Creed” each time they come together and believe in its content verbatim.

“[God] Himself gives to all people life and breath and all things.” (Acts 17:25)

“And there is salvation in no one else; for there is no other name under heaven that has been given among men by which we must be saved.” (Acts 4:12)

Case 1

“They gained pretty double eyelids without any surgery”

People say that the eyes are the window to the soul. The appearance of one's eyes may affect that person's initial impression. In particular, large and clear eyes are likely to make a favorable impression. Double eyelids (with a crease into upper eyelid) form when levator palpebrae superioris muscle transforms into levator aponeurosis and attaches to palpebral skin. Asians usually do not have levator aponeurosis connective tissue, so many of them do not have double eyelids. But many Manmin Central Church's members have come to have double eyelids without any surgery through the prayer of Senior Pastor Dr. Jaerock Lee, founder of WCDN. Here are a few of those people.

Sister Haemi Ma, age 24, belongs to Heavenly Dance Team of Performing Arts

Committee in Manmin Central Church. She had to make creases in her eyelids for every performance, so it took her quite long time. She wished she had double eyelids.

She harbored this wish of hers and shook hands with Dr. Lee. Then she was strongly moved and she felt like she would gain double eyelids. So she laid her hand on her eyes and prayed shortly after she shook hands with Senior Pastor Dr. Lee. Then double eyelids were formed! God answered her heart's desire.

Senior Deaconess Mikyung Seo, age 47, got double eyelids

after receiving Dr. Lee's prayer during Manmin Summer Retreat 2014.

While receiving the prayer, she thoroughly repented that she had harbored resentment and hatred towards her mother as she was growing up. At that moment the Holy Spirit's fire came upon her. Then she laid her hands on her eyes because she had small eyes and wanted double eyelids. Afterwards, at home when she washed her face, she found her double eyelids in the mirror.

Deaconess Eunkyung Park, age 43, at the age of 29 she prayed with faith to

have double eyelids and sprayed Muan Sweet Water. Then she too gained double eyelids.

Muan Sweet Water is the sweet drinkable water changed from salty sea water in the sea area of Muan in Jeonnam. It is just the same as the bitter water at Marah changed into sweet water in Exodus 15. When people drink, apply, and spray the water, they can experience God's powerful works. Through the water, levator aponeurosis tissue and double eyelids were formed.

Case 2

“Ebola virus has been terminated in DR Congo”

The first outbreak of the Ebola Virus Disease occurred near the Ebola River in DR Congo in 1976. The current outbreak in West Africa, (first cases reported in March 2014), is the largest and most complex Ebola outbreak. As of April 2015, this outbreak has around 25,556 reported cases resulting in more than 10,587 deaths. The disease has a high risk of death, killing between 25 and 90 percent of those infected, with an average of about 50 percent. DR Congo is the country where the first outbreak occurred. It has experienced seven outbreaks which unsettled the people.

It is thought that fruit bats are natural Ebola virus hosts. Ebola is introduced into the human population through close contact with the blood, secretions, organs or other bodily fluids of infected animals such as chimpanzees, gorillas, fruit bats, forest antelope found ill or dead or in the rainforest.

Ebola virus enters into human body and destroys natural killer cells. It causes deterioration of immunity and destruction of endothelium. It also increases permeability of blood vessels, which causes swelling and shock. Moreover,

it destroys liver cells. This results in restraining blood coagulation factors. It leads to bleeding, shock, and even death.

First symptoms are the sudden onset of fever fatigue, muscle pain, headache and sore throat. This is followed by vomiting, diarrhea, rash, symptoms of impaired kidney and liver function, and in some cases, both internal and external bleeding. But no vaccine has been developed.

Let's now focus on a testimony concerning the end of the 2014 Ebola virus outbreak in Boende, DR Congo that was delivered by Governor Sebastien Impeto Pengo.

On August 11, 2014, a woman in Ikanamongo Village died of the Ebola virus. Within a week after the death, 13 people were reported to have died of Ebola-like symptoms. On September 2, the World Health Organization (WHO) said that there were currently 31 deaths and 53 confirmed cases. It was a national emergency. DR Congo President Joseph Kabila commanded Equateur State Governor Sebastien Impeto Pengo to terminate Ebola virus outbreak, but there was nothing he could do.

Governor Pengo had been attending Kinshasa Manmin Church in DR Congo for six years. He witnessed many signs, wonders, and powerful works manifested through Dr. Jaerock Lee. So he asked Dr. Lee to pray for the termination of the Ebola virus. He prayed for this. From that time on there were no more people infected and no more deaths.

According to WHO recommendations, the end of an Ebola virus disease outbreak in a country can be declared once 42 days have passed with no new cases detected. The 42 days represents twice the maximum incubation period for Ebola (21 days). There was no new case for 42 days, and DR Congo becomes free of Ebola transmission. Many people were protected from the virus though even a case is hard to be treated. Glory be to God! Thank you Dr. Jaerock Lee!

Malaysia 2015

The Living God's Healing Works

Christian doctors gathered in Malaysia in 2015. They had WCDN International Christian Medical Conference and glorified God by proving His works with medical data. From many presented cases, here are several cases of healing works performed by Dr. Jaerock Lee.

Dr. Joonsung Kim, Head Director of Mirae Children's Hospital in Paju

Dr. Brian S. Yeo, General Secretary of WCDN

Dr. Changkyu Yang, Director of Bansuk Internal Medicine-Radiology

"She was free from danger of vision loss caused by choroidal neovascularization"

Sister Nayoung Choi, age 17, had excessive myopia (nearsightedness). In December 2013, all of a sudden, her left eye became distorted and her vision blurred. She had a hard time

not only studying but also doing everything in her everyday life.

In April, 2014, she had an ophthalmologic exam, and she was diagnosed with myopic choroidal neovascularization (CNV). CNV refers to the creation of new blood vessels in the choroidal layer of the eye. CNV can create a sudden deterioration of central vision, color disturbances, and metamorphopsia. CNV is treated with intravitreal injection of angiogenesis inhibitors (anti-VEGF drugs). Without the proper treatment, it results in loss of sight.

In August 2014, she received Dr. Jaerock Lee's prayer during the seminar of Manmin Summer Retreat with her heart. Then all symptoms disappeared and she came to see things clearly. Her OCT findings were much improved. The doctor was surprised to see the result and said it was a miracle that CNV was cured without anti-VEGF drugs.

◀ Before the prayer: unclear interface, active

▶ After the prayer: clear interface, inactive

"On the doorstep of death he survived heart failure with pulmonary edema"

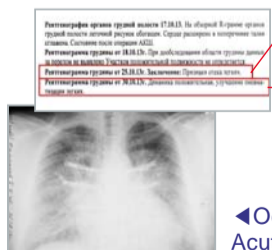

Pavel Kalmykov, age 48, he had coronary heart disease and in 2012 he had coronary artery bypass. In 2013, he complained sudden onset of constricting chest pain which occurred during mild physical activities. On October 15, he was

hospitalized.

His condition at that time was moderate. But his condition went worse so dramatically that he needed morphine to sleep and had acute left ventricular failure with pulmonary edema. At that time nobody would have said that he could survive it. Ten days later, he was moved to the Intensive Care Unit but his state got worse and worse. Because of the worsening condition, his wife was told by his doctor to prepare for his death.

The next evening, his wife asked his brother Pastor Yuri Kalmykov in Israel to pray for him by phone. At the right time, Rev. Soojin Lee was leading the 4th Israel Crusade commemorating Dr. Jaerock Lee's Israel Crusade 2009. For his brother in Zolskaya, Pastor Yuri Kalmykov received Pastor Lee's prayer of the handkerchief on which Dr. Lee had prayed (Acts 19:11-12).

The next morning, Pavel woke up by himself, ate some food, and slept without morphine. When he was discharged from hospital, he had a check-up, and the X-ray showed that pulmonary edema was completely gone.

◀ October 25, 2013 Acute pulmonary edema

October 25, 2013 Onset of acute pulmonary edema
October 30, 2013 No pulmonary edema

"She was healed of nasolacrimal duct obstruction"

Junior Deaconess Youngsun Cho, age 73, felt blockage of the nasolacrimal duct in 2001. From that time on eye sleep mucus formed and tears were running down. She found it hard to put on a makeup, and it caused

inconvenience in everyday life.

She had a tube intubation surgery into her nose but when she took it out tears came out again. Afterwards, tears kept running down, so she had two more intubations. However, the condition persisted. Now she gave up its treatment and had no choice but to live with it.

In 2014, she participated in Manmin Summer Retreat and received Dr. Jaerock Lee's prayer. On the last day of the summer retreat, yellowish discharge started to run down from her nostril. It lasted for two weeks. On Sunday morning two weeks later, she sneezed. Right then, she felt her nostril was clear all the way up to the lower part of the eye. From then the nasolacrimal duct obstruction was gone. She no longer had the eye sleep mucus and tears stopped.

Her nasolacrimal duct obstruction was not cured with medicine, but it was treated by the prayer. It is amazing. After the presentation, many Christian doctors rejoiced and gave great glory to God.
